

**Recombinant Human  
Wnt3A**

**Catalog # (Size):**    HZ-1295 (5µg)    HZ-1296 (10µg)    HZ-1297 (100µg)

**Product Description**

- Animal-derived product free
- High Activity
- Lyophilized and Carrier Free (CF)

Wnt3A<sup>HuXp</sup> is a member of the Wnt gene family that consists of structurally linked genes that encode secreted signaling proteins. These proteins are associated with oncogenesis and in numerous developmental processes. These processes include regulation of cell fate and patterning during embryogenesis. Human Wnt3A is a protein which shows 84% identity relative to other human Wnt3 proteins. Wnt3A plays a key role in maintaining the integrity of embryonic and adult tissues. The post-translational glycosylation and acylation of Wnts are essential for their efficient secretion and biological activity.

**Typical Specifications**

<b>Species</b>	Human
<b>Expression</b>	HEK293 Cell Expressed
<b>Activity</b>	Typically ≤ 20 ng/mL EC <sub>50</sub>
<b>Purity</b>	>90%
<b>Endotoxin</b>	<1 EU/µg
<b>Molecular Mass</b>	38-42 kDa
<b>Formulation</b>	1x PBS pH 7.4 + 500mM NaCl + 1% CHAPS

**Purity Confirmation**

The protein was resolved by SDS-polyacrylamide gel electrophoresis and the gel was stained with Coomassie blue.

**Activity Assay**

The activity was determined by dose dependent Alkaline Phosphatase production in MC3T3 E1 mouse preosteoblast cells<sup>(1)</sup> and stabilization of beta catenin in mouse L929 cells<sup>(2)</sup>.

**Reconstitution Buffer**

Briefly centrifuge the vial before opening. It is recommended to reconstitute the protein to ≤100µg/mL in sterile 1x PBS containing 0.1% endotoxin-free HSA.

*(Complimentary HSA will be provided with shipment)*

All HumaXpress<sup>®</sup> HumanKine<sup>™</sup> are animal-component-free and Xeno-free<sup>™</sup>
