

Recombinant Human Cystatin C

Catalog # (Size): HZ-1211 (10µg) HZ-1266 (100µg) HZ-1212 (1000µg)

Product Description

- Endotoxin-free
- Animal-derived product free
- Available in Bulk
- High Activity

Xeno-free Cystatin C^{HuXp} (Cys-C) is expressed in human 293 cells as a monomer with an apparent molecular mass of 12 to 13 kDa. Native Cys-C in human urine is found in two different forms: one with pI 9.2 and the other with pI 7.8 by elimination of small basic peptides or amino acids from the N-terminal end of protein. Cystatin C has been studied for its role in predicting new-onset or deteriorating cardiovascular disease. This cytokine is produced in a serum-free, chemically defined media.

Typical Specifications

Species	Human
Expression	HEK293 Cell Expressed
Activity	Typically $\leq 5 \mu\text{M}$ IC ₅₀
Purity	>95%
Endotoxin	<1 EU/µg
Molecular Mass	12 to 13 kDa, monomer, non-glycosylated
Formulation	1x PBS

Purity Confirmation

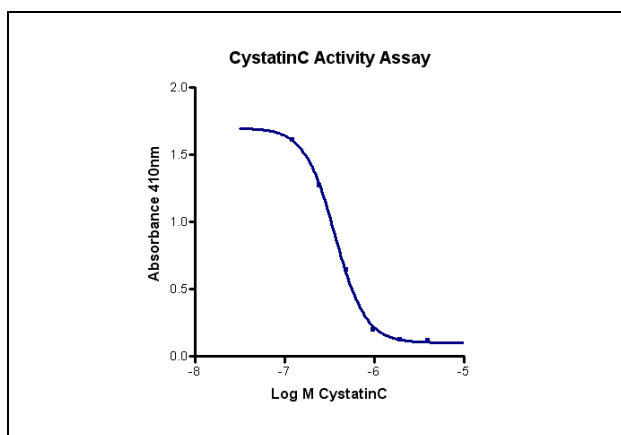

The protein was resolved by SDS-polyacrylamide gel electrophoresis and the gel was stained with Coomassie blue.

Activity Assay

The inhibitory function of Cystatin C on papain's protease activity was measured by a colorimetric assay using L-BAPA as substrate. IC₅₀ value was measured at 5 to 20 µg/mL (0.3 to 1.5 µM) with a range of 1.56 µg/mL to 50 µg/mL Cystatin C in presence of 0.55 µM papain and 0.44 µM L-BAPA

All HumaXpress® HumanKine™ are animal-component-free and Xeno-free™

Reconstitution Buffer

Briefly centrifuge the vial before opening. It is recommended to reconstitute the protein in sterile 1x PBS.

Limited Use and Restrictions Unless otherwise stated in our catalog or other company documentation accompanying the products sold by HumanZyme Inc. are intended for research use only and are not to be used for any other purpose, which includes but is not limited to, unauthorized commercial uses, including resale or use in manufacture, in vitro diagnostic uses, ex vivo or in vivo therapeutic uses or any type of consumption or application to humans or animals.
