Endotoxin Free

Product Description

Animal-free Recombinant Human TGF beta 3 is expressed from human 293 cells as a mature disulfide-linked homodimer with apparent molecular mass of 25 kDa. This cytokine is produced in a human cell expression system with serum-free, chemically defined media. The cytokine is greater than 95% pure.

Activity Data

Recombinant human TGF beta 3 (HZ-1090) inhibits IL-4 induced proliferation of the HT-2 mouse cell line. HT-2 cells are Balb/c spleen cells activated by sheep erythrocytes in the presence of IL-2. Cell number was quantitatively assessed by PrestoBlue[®] cell viability reagent. HT-2 cells were treated with increasing concentrations of recombinant TGF beta 3 for 72 hours. The EC50 was
